**RE: Mercury Free Statement**

**To Whom It May Concern:**

Mercury is a naturally occurring element that is found in materials and chemicals at trace levels. For this reason, RISCO, Incorporated defines "mercury-free" as not having mercury at greater than detection limits of 0.001 wt. % for solids, and 0.001 mg/l for liquids.

RISCO, Incorporated's quality department has reviewed our supply chain, used in the manufacturing process of our fasteners, and have come to the conclusion that our products do not come into contact with mercury or mercury bearing compounds during manufacturing, inspection, and testing, at more than trace levels as defined above.

If you should have any questions or concerns, please do not hesitate to contact me.

A handwritten signature in black ink, appearing to read 'Lisa Frainee', is written over a horizontal line.
